

Please do not change the new Indiana law....It provides a level of privacy, especially during dinner, that has not been found in homes for quite sometime. Before the new law, I was receiving unwanted calls EVERY night during dinner, usually more than once. I have to answer each call due to the fact of the age & health of my parents and these calls were very upsetting. I am currently receiving only about one a week now, something I can now handle. Please leave the law alone. Thank You.
